Topic: **Diabetes Treated with Chlorine Dioxide**

Edition 2022.9

Diabetes: The 9th highest cause of death

Although there is a lot that can be explained with Diabetes, my simplified understanding is that it is related to the over or underproduction of insulin in the body. It is generally understood that the cause of this is that the pancreas (which makes the insulin) is damaged and malfunctioning, which leads to a slew of other health problems including organ damage, skin infections that don't heal, neuropathy, extremely low or high blood sugar levels, blindness etc.

There are basically 3 types of diabetes which are:

1. **Type 1** (juvenile)
2. **Type 2**
3. **Gestational**

Traditional Western Medicine understanding will explain the causes of Diabetes as coming from genetics, high blood pressure, obesity, viruses and poor diet. Treatments for this include medication, better diet, exercise, weight loss and insulin supplementation - for type 1 - to help with the disease. If these practices are not achieved, there

are several surgeries to help individuals to avoid further complications from Diabetes. These surgeries include a variation of gastric reductions, kidney dialysis, kidney replacement, and the amputation of infected limbs.

HOW ClO₂ STOPS Diabetes?

Chlorine dioxide works to quickly remove toxins that are causing damage in the pancreas, kidneys and other areas affected by the disease. From this, the organs are able to heal at a faster rate while improving their proper function in helping the body. Additionally, ClO₂ fights and removes skin and internal infections on the body through oxidation while simultaneously adding oxygen and better blood flow with the oxygen and chlorine atoms into the system. As usual, I emphasize that ClO₂ is not technically a "cure" to diabetes, but it does detoxify and neutralize several of the sources of the disease which then allows the body to heal and recover faster on its own. As I understand it, these detoxification processes are known as "Oxidation", "Oxygenation" and "Chloridation" and they are all

beneficial to the body's homeostatic balance.

Treatment of Diabetes with Chlorine Dioxide is one of the simplest protocols. It is typically done with a [Protocol 1000](#) (or 1000+) with MMS or a [Protocol C](#) with CDS. If there are skin infections on the body, one can treat them with the [spray bottle protocol](#) or the bath protocol multiple times a day to quickly reduce infections on visible sores.

Although diabetes is treatable with Chlorine Dioxide, it is also critically helpful for the patient to work towards lifestyle changes with a more natural diet (with less processed foods), exercise and lower stress levels.

TESTIMONIALS (Unedited with Initials):

(Anon)

Made a great friend 8 years ago - 53 years old, blinded by **diabetic neuropathy**, stage 4 renal failure and giving himself insulin shots daily. I had used MMS years prior. When Quantum Leap documentary came out, I invited him to have

Learn more about Molecular Medicines at <https://chlorinedioxidetruth.weebly.com/>

a listen. Immediately on board, we did a 3 week detox together. After about 4 weeks from start, he found he was no longer in need of insulin and over the next couple months lost 35 lbs. I fill his 32 oz. bottles regularly as he uses them whenever he needs. Thank-you Jim, et al. God with us!!!

(Jesus V)

All I can say is just my experience with a friend. My friend who is 49 years old was suffering of **diabetes type 2**. I gave him the MMS and in 3 months he healed his body. He became full vegetarian and its it healthy again. He only used the MMS for 4 months. I believe it really works. I don't know why but I think government and pharma companies are together in NOT helping people to be heal because is a big business, a big mafia. I am glad I helped my friend by using other alternatives.

(Anon)

MMS works, that's why they have to trash it. My dad took it for his **diabetes** and in 3 weeks he didn't need his insulin anymore. The pancreas gets overloaded with toxins and doesn't function properly. Get the toxins out and it starts

functioning properly, it's as simple as that!

(Gilbert M)

Mr Lord, I have been taken it for 3 years and Now I am not talking any drogs for **Diavetes** high colesterol, hipertensión, and other things that Drs say I had, so it works for me, I am 70 years old...

(Jim Humble Writing)

During the time I was finishing writing the final chapters of the first edition I lived in my friend's house, Ed Heft, right on the water. It was in a bay just off of the Sea of Cortes. I drove two blocks each day with my 85 year old friend, Albert, to a small Mexican restaurant. We drove because he really didn't feel like the walk.

There we had our lunch and enjoyed the day. A Mexican lady and her husband ran the restaurant and, of course, cooked us Mexican food. One day after several months, I notice the lady sitting down and she did not look good at all. I asked what was wrong. Her husband spoke a little English and they made me understand it was a bad case of the flu. I said wait just a minute and I went out to my car for a bottle of MMS.

I came back and without speaking Spanish I mixed a 6

drop drink, using some lemon juice as the activator, waited three minutes and indicated needing pineapple juice for the drink. I added the pineapple juice and handed it to her and she drank it. It always amazed me as I have never had a single person refuse to drink a dose of MMS.

I must have a good bedside manner as even the government officials in Malawi always drank the dose of MMS that I mixed up for a demonstration. No one ever said no. Well, anyway I indicated through waving my hands and talking and pointing at my watch that she should take another dose that evening in the same way, and then some more the next day.

I didn't get back to the restaurant for about three weeks. The lady and her husband invited me to sit down at their table. She had been taking the MMS in 6 drop doses a couple of times a day for three weeks. I didn't tell her to. She just did it. But what had happened was that her need for insulin for her **diabetes** had reduced to zero. She needed none and she was feeling much better. When her Flu had gone away she had decided the MMS must be really good and just decided to continue taking it. She was absolutely happy and

they served me a free lunch that day.

So how often does one see miracles? Well, when you count the emails, and telephone calls, and local people dropping buy I average about one miracle a day. However, I know that hundreds of miracles are happening because thousands of people are taking MMS daily. I have to say that I am no doubt the luckiest man on Earth. Here in the later part of my life I get to do something that is more fun than anything anyone could possibly do. I hate to use the word fun as it is beyond fun. The reward is instantaneous. Each day is rewarding and something new. All I have to do is just keep pushing and that's easy.

(Warren)

Was diagnosed with **type 2 diabetes** in 2004. I earned my diabetes through eating fast foods / smoking / drinking. So I thought that I would be able to earn my health back so. I gave up smoking all alcohol and most fast foods. Started on green smoothies and then my body rejected meat and a week latter fish. So now I am a vegetarian. Got a finger pricker and seemed to be doing OK so stopped seeing the doctor in 2008.

There were times when I would start to shiver then threw up then progressed into sweating and if I moved my head at a normal speed when getting in and out of bed the room would spin like when really drunk. I would drink water and pee every hour or two for 1 to 2 days then come right again. This would happen 3 to 6 times a year. But I put it down to eating the wrong foods or over working or both.

Jan 2016 came round and I was flat on my back for 5 days and things where not coming right? So went to the doctor and had blood and urine test. (results in this E-mail). I was then told that I had to go to hospital and learn how to inject myself with insulin! And from now on I would be called up for a blood test every 3 months. So now I was a **type 1 diabetic** with high blood pressure and passing protean through my urine.

I refused to go the get educated on insulin injecting and said I had a few more cards to play and would re-evaluate in 3 months time when the next blood test would happen.

I then went home and gave up all fast foods and started this very strange thing called exercise. Every day apart from Sunday.

A couple of weeks go buy and I get a E-mail from Kacper re the Quantum Leap Video. We have followed Kacper for many years from the time he sold how to build a Dome and grow your own food. We have his washing magnets and water Vitaliser. He has always been straight up and we love his products. (he carries weight with us and we trust him)

Watched the video. Bought the products from Genesis 2 Church and worked the way up to 1000+. Went for the Blood and Urine test. (results also in this E-mail)

Now I am **NO Longer a Diabetic.**

Thanks Again.

I hope my story inspires others to follow this path until it becomes the size of LA Freeway.

(Nadim)

Hi, my name is Nadim, 54 yrs from Syria live in Canada, recently I took MMS for my diabetes and high blood pressure. I use protocol 1000 and the results amazing really really I can't believe after I had been taking drugs for many years.. I'm so happy to live without drugs now. I encourage everyone to stop drugs and take

MMS miracle. Thanks for humanities

(Ron/Matthew)

Praise God for his healing and miracle on Matthew. As Ron has suggested that I need to share Matthew's miracle healing with you. I am so sorry it has taken me a while to get back to you but it has been quite busy for me, plus I am trying to deal with my 15 year son who is starting to explore this world not as parents always expected. Matthew Fa'anunu is 10 years old from Vava'u, Tonga. He was diagnosed with **Type 1 Diabetic** in January 2018, a very rare disease not common with the Polynesian people. He was hospitalized for 3 weeks and he was hyperglycemia. The doctor advised my family that's Matthew's pancreas is totally damaged and he would be on insulin injection for the rest of his life. I had to monitor his sugar level by measuring it at 7.a.m, 12 p.m. and 7 p.m. daily plus recording all his food intake and regular clinic appointment. Matthew was re-admitted to the hospital as he was consuming the wrong foods at school and went through hyperglycemia again. He was in the hospital for 2 weeks. He was on insulin all right through until I met Ron Pringle in

September in Vava'u. He shared with me about MMS and I immediately joined Ron in taking the MMS both for myself and also for my son Matthew. I continued to measure his blood sugar as usual and finally decided to take him off the insulin on the 1st week of October. Matthew will be 7th week this Saturday without the insulin, which is a **MIRACLE**. His blood sugar has never gone above 6.2 (BSL) so far, even he had enjoyed coconut cake and chocolate brownie. Matthew is a blessing and **MMS IS TRULY A MIRACLE**. I am so grateful to God that Ron was sent to us. Matthew is now a very happy young boy free of insulin injection which he complained about. I am so grateful for this healing and curing of Matthew's **Type 1 Diabetic** with MMS. Imagine if the world knows about this, and what MMS can do. I am a firm believer of MMS and am promoting it in Tonga. I am yet to get the sodium cholrite from USA as I have asked my sister to order for me. I want to share with you the miracle happened to my son Matthew. My family is all on MMS. As for me, I have lost weight and also my aching joints are no longer in pain. I am very active now, thanks to MMS.

(Kerry)

Have got 2 people now using MMS to help control **diabetes**. One of them got onto it while she was in the middle of tests for what the doctors must of thought was something serious. After about 4 weeks of taking it, one night she kept disappearing to the loo. Said she was weeing blood and clots... I presume it was the tumour. She was fine the next day and 100 per ever since. The doctors did their test and were surprized to find nothing. Lol.

(Yli)

Hello my friends. I helped a woman to cure **Diabetes Type 2** and Ulcerative Colitis. Before she tried everything and nothing helped her and she was in a lot of pain. She did Protocol 1000 and in 6 weeks she was totally healed.MMS it's a miracle.

(Jahmasin)

I have a client here in Jamaica that has sever **diabetes**. 20 years on injections. She started taking MMS (6 drops in the morning and 6 drops at night), not even dropping them in her eye. She was scheduled for surgery and had to travel 3

hours to get to the hospital were she would have the surgery. She first went for consultation and the specialist said she definitely needed the surgery and urgently. Her eye looked like she had been punched in it. The sugar in the blood is like glass in the eye. That is what causes the bleeding. She was on the drops for a couple of weeks and her eye visibly started turning from blood red to pink and then to white (normal). She went to have the surgery and the doctor was shocked (to say the least) he said he didn't understand how this happened but he sent her home and said she didn't need the surgery again.

(Edwin T)

Dear Sir Jim Humble; It is my pleasure to post the success story i have experienced using MMS2 for my friend. He had this **diabetes** for years already without improvement. It takes about a month only. Using gradual increase day by day until able to take 4 caps a day at 2 to 3 hour time frame. Here is how he achieved it.... he also take enzyme at the same time. Before he start MMS2. The reading was 7.+, now the reading was 5.+ He never had this reading before. He now taking it daily at 1 to 2 caps. I

am glad to finally obtain the MMS1 25% solution. It does work too. Am having it often now. Will wait the arrival of your DVD to finish my exam on MMS.

(Michelle)

My sister an i did the protocol 1000, we both had **issues with blood pressure an our sugar numbers were starting to climb**. After doing the protocol together we both had amazing results. when we first started we were skeptical an didn't notice anything happening much. after doing the protocol an when we finished a few days later things started to happen an our numbers dropped, we were both thrilled with these results an shocked. we are both doing the maintenance dose every night. we both have been trying for years using supplements changing our diets spending money on these things over the years have really cost us alot of time an money. we had to give this a chance an volla IT WORKED IT IS AMAZING AN WE WANT TO TELL EVERYONE WE KNOW TO TRY THIS. Now my daughter is preparing to do the protocol an hopes to heal her sinuses an intolerance to wheat an gluten. I would like to thank all of you for

the good work your doing an bless you all. We are so happy an we feel so good an want others to feel good too. My sister an I are in our 60's an were struggling to stay away from the doctors an their big pharma. I am happy to say neither one of us are on medicine an we feel great. We always buy organic, grassfed, wild caught, non gmo, pasture raised etc. we shop at farms an farmers markets, an we have a garden an organic garden where we grow herbs an fruits an vegetables. We never use plastics, we clean our homes without chemicals, we don't use lotions or perfumes we wash our clothes in homemade soap. we make alot of our own stuff an we use vingar an water to clean our homes. we use baking soda for cleaning. we are both holistic an have been for a long time. we even use good soaps an shampoos an know what to stay away from. with all that we did we could never get well totally until we used MMS an now we are even better. Please keep up the good work we love the news letters the radio broadcast an the forums an all the good info you give out we have the book we have the dms0 which is awesome stuff for aches an pains. we even do DE an Benonite Clay, Olive leaf. They work really good now that we did the MMS those things now

work better than ever like everything else we have. THANK YOU THANK YOU THANK YOU BLESS YOU ALL, KEEP UP THE GOOD WORK. WITH LOVE, FROM ME AND MY SISTER IN NJ PLEASE DO A SEMINAR HERE IN WHITING, NJ WOULD LOVE TO HAVE YOU HERE.

(Bob)

Thanks for all your great work! A friend told me about MMS about 12 years ago. At that time I was suffering from genital herpes outbreaks at 1 to 2 per month. I the old protocol of 9 drops of activated MMS in water for about 4 months and then added DMSO to the treatment. I stopped the treatment at about 1 year. The result; 0 outbreaks in over 11 years. I continued to use MMS sporadically over the years for various small problems. 2 months ago, my **type 2 diabetes**. took a real turn for the worse. Blood sugar was measuring out at 250 plus each morning. I was on Metformin at a rate of 2 per day and the Doctor was ready to prescribe Insulin. I came across your article about the success of MMC with **diabetes**. So, based on my earlier experiences with MMS I used Protocol 1 (3 activated drops of MMS with 3 drops of DMSO every hour for 8

hours, for 21 days). I tell you, this was not easy but it was doable. My blood sugar readings started coming down after the 3rd day. Now, after 2 months, my morning readings are mostly around 100. Awesome! On my monthly blood test the Doctor said that she was very surprised and pleased with the results. Two diseases that were supposedly incurable. Way to go MMS. Thank you to Jim Humble and friends.

Bob

(Wulfric K)

In 2014 I became very sick, as i stumbled into the emergency room and passed out, i found myself in ICU for three days, and admitted to hospital for a week. **Diabetes** had claimed another person. This is in addition to my High Blood pressure, and chronic pain. So i began my 4 injections a day for the rest of my life, and hefty payments monthly in adotion to my blood pressure pills and anti-inflamation pills. Well long story short, In November of 2015 I began Protocol 1000 recommended by a friend who has all the ingredients for all protocols and volunteered to help me, after 3 weeks of Protocol 1000 I no longer take my Insulin, Metformin, High Blood pressure, or any other

meds anymore! While i am not totally healed as of yet, just a little more MMS and I am confident I will be, So much so I have My own bag of essentials go where i go and help others heal themselves. I find the toughest part of the whole process is to convince people to try MMS. The powers that be have had free range for far to long to hide the truth. I was given the go ahead to take the Healing Waters approved by Spirit and it was one of the best decision of my life, and could be yours as well. Blessing to All.

(Nikki)

Thank you Kindly, it is a wonderful product, the grandfather is now off his diabetes pills (so many of them) and is so much happier and so full of life again. It is a miracle product.

(Frank)

I see very little on MMS 2, why is that? Jim once told me the MMS 2 is just as effective as the MMS 1 and yet there's not much information available on MMS 2.

I have used Calcium Hypochlorite internally to help

cure **Diabetes** 3 times as far as I know, heal Cancer, for general detoxification while raising ones immune system, kill Parasites and I have been having great success using it externally to close large Ulcers, heal Acne (it literally reforms the skin and closes the holes created by Acne), kill stubborn Fungus and I swear by it!

(Christie P)

I brought my friend with **Diabetes** over and treated him every hour for 5 or 6 hours because his blood sugar was close to 500. Treating him brought his blood sugar down to 91 in those short hours. FACT!

I had a bad case of Edema on my legs and thought I had a blood clot. I treated myself with Protocol 1000 and within a few days - my legs were back to normal. No pitting, swelling, etc.

I treated another person with 3rd degree burns on his leg from a dirt bike burn on top of another burn. Within a few days, it was completely scabbed over and healed a month ahead of time.

Treating a guy with throat cancer. His blood count is back up, gained a little weight, and

his doctor said whatever he is doing to keep doing it because it is working.

(Joe)

I have a coworker who I gave MMS and 50% citric acid.

I told him to start with 1 drop and go to 2 drops and stay there for a while until I talk to him again.

He did this for a few weeks.

I spoke with him last week and he said he went to take his insulin (from **diabetes**) and noticed that it was too strong for him.

I think he may have had sweating and some other symptoms from having too much insulin.^a

He consulted with his doctor who said to reduce his insulin dose.

He told me that he had been on insulin for a year before this and his insulin needs were constant during that time.

He had an insulin pen and he used to take about 22 or 24 units of insulin.

I don't know what the units are. Now he takes 12.

* I asked him if anything else could be attributed to this insulin reduction and he said nothing else could be the

reason. Nothing else was used. Only MMS.

He told me he is very good with keeping his blood sugar in check and always needed the higher (22 or 24 units) dose.

After being on MMS (2 drops) once a day in the morning for about 2 or 3 weeks, he had that reaction from too much insulin and now he takes about half. This is a good money savings for him too. He said his cost in the past was about \$100 per month, so that is a real savings.

Another thing:

He had this real bad arthritis in his rotator cuff (shoulder). He couldn't lift his right arm without help from his left. He had a real difficult time just to lift it to turn a door knob. Now, he can lift his right arm on its own without help and he can lift it higher than his shoulder. He did this while I watched. He said nothing other than MMS could be responsible.

He also said that before he took MMS, he did not expect it to work.

In fact, I had mentioned MMS to him months earlier and I wasn't really sure he seriously wanted it because it is difficult for me to read what other people are thinking.

I finally gave him about a tablespoon or less of MMS and CA in two bottles.

I wrote instructions on paper and handed it to him.

I really think he likes it. He has asked me for more and I intend to give him full bottles now.

(Pierre)

I have been practicing homeopathy and naturopathy since 1982 and lately I had been using MMS and CDS as well. Before I used it on my friends and family members with their consent, of course, I first used it myself. My father who is 89 this year had tinnitus for some time and allopathic doctor gave him pills of course. That was not helping. The problem persisted for several months first affected one ear later the other one. Just after using MMS for 4 days the tinnitus was gone. He keeps using MMS to help his slightly enlarged prostate, too. He called me after 4 days and told me. "I cannot believe it how great I feel now." I went to see him and he rushed to the door to open it for me after I rang the bell and when he opened the door he was smiling, his facial expression was cheerful and he looked like he was 15 years younger, full of strength as well. My close she-friend, Dr. Blanka, MD usually takes what I prescribe her, whether it is a herb or

something else. She read Jim Humble's website and seen video as well and she has seen me taking it so she trusted it from the very beginning. She had problem with her pancreas, always feeling hungry, which is a beginning of **diabetes**. After using MMS for 2 weeks she stopped eating frequently, which is a result of curing the pancreas and now she eats as she should be, her constant hunger is gone. As for myself. I am in good health, and vegetarian, divided way of eating, etc., for many years, so I can use MMS without any nausea in large doses and I can even use large capsule of MMS2 without slight problem, I do not even notice it when I take it. But my sight had improved so dramatically that after 2-3 weeks of taking MMS1, and not quite as I should every hour but at the different times, I could read small print in the magazine just about 2 days ago and did not have to use my glasses at all, not even once. I was amazed. I tested drops and used them in my eye. I even tested MMS2, dissolved it in the water because I wanted to see what will happen if taken instead of in the capsule just straight with water. I dissolved $\text{Ca}(\text{ClO})_2$ in water and when completely dissolved I took a syringe and opened one capsule and filled it with liquid,

then closed it and swallowed it with water. Nothing happened. There was still plenty of the solution left in the glass so I added about 2 dcl of water and drank it. That was a big mistake!!!! Do not ever do it!!! You won't be able to breathe for awhile and you will feel like you are suffocating. I grabbed more water and drank it and finally after about five minutes it all came back to normal. So, if doing MMS2 do it as it says in the protocol. I did it because Mr. Humble wrote that they never tried it any other way so stick to the way that was approved. Yes, do exactly that. Now I am using CDS as well. It has absolutely no side effects, you won't have any diarrhoea or stomach upset. It works I really recommend it without any fear. We are having all these wonderful results within just days. I can't wait to see them after few week or even months. I'll keep you all posted.

Sincerely

Pierre

(DD)

Short history, was healthy 5 years ago in May with an A1C of 5.0 and fasting glucose level of 104. In November of the same year, hospitalized with glucose of 850+ and A1C of 12.5. That is

only 5 months, not the normal 10 - 12 years before failing to insulin. I immediately was insulin dependent, which I kept tight control of the glucose levels

I stumbled accross MMS a year ago, and just last month started on MMS due to a bad flu bug. Did the Clara 6 and 6 protocol, and poof, no flu the next day. So, I did 6 drops in the morning and 6 in the evening and after a week noticed that I had to dial the insulin usage down. Then I read the full protocol 1000, I started that 3 weeks ago, and had a doc visit today. My A1C is back to 5.0, and I was taken off all insulin (for **diabetes**). I am

still taking Metformin to protect the kidneys that are stressed (blood work). I also have hyper-tension, which is not under control yet. This is a work in progress, as I am beginning to start MMS2 to speed things up.

I will update again when I am off all **diabetic** meds, and hopefully blood pressure meds as well. Side note, I had a gall bladder attack last month, and have several stones, largest is 12 mm. Since starting protocol 1000 I have had no acute attacks.
